Class 6 Complete Science Lesson Plan

Biology | Astronomy | Ecology | Grade 5-7 | Age 10-13 | 10 Illustration Requests

Section A: Colouring Page Outlines [Black & White, Print-ready]

1. Outline a detailed human digestive system diagram for Class 6 Biology showing mouth, oesophagus, stomach, small intestine, large intestine, and liver with empty label boxes for students to fill in

2. Draw a life cycle of a butterfly outline illustration showing all four stages: egg on leaf, caterpillar eating leaf, chrysalis hanging from branch, and fully formed adult butterfly with patterned wings -- thick clean lines for colouring

3. Sketch a cross-section of a plant cell outline showing the nucleus, cell wall, cell membrane, chloroplasts, mitochondria, vacuole, and endoplasmic reticulum with connecting arrows and blank label lines

Section B: Educational Flashcard Illustrations [Bright Colour, Screen & Print]

4. Photosynthesis process flashcard illustration: a bright colourful diagram of a sunlit green leaf with arrows showing sunlight energy in, water absorbed through roots, carbon dioxide entering through stomata, glucose stored in leaf, and oxygen released -- flat vector style educational flashcard

5. Water cycle complete flashcard: vibrant illustration showing the full water cycle with a blue ocean, evaporation arrows rising, white clouds forming through condensation, rain precipitation falling on mountains, rivers flowing back to ocean, and underground water table -- educational diagram style

6. Forest food chain flashcard: bright educational illustration of a complete food chain showing grass at the bottom, grasshopper eating grass, green frog eating grasshopper, garden snake eating frog, and eagle at the top -- labelled with Producer, Primary Consumer, Secondary Consumer, Tertiary Consumer, Apex Predator

Section C: High-Resolution Classroom Poster Illustrations [Full Colour, A2 Print Quality]

7. Solar system vibrant classroom poster: spectacular full-colour illustration of all eight planets orbiting the sun in correct order -- Mercury, Venus, Earth, Mars, Jupiter with Great Red Spot, Saturn with detailed ring system, Uranus, and Neptune -- with asteroid belt, accurate relative sizes, and planet name labels on dark space background with stars and nebula

8. Endangered animals of India conservation poster: dramatic colourful illustration featuring Bengal tiger in tall grass, Asiatic lion on rocky outcrop, snow leopard on Himalayan mountain, Indian one-horned rhinoceros in wetland, and Gangetic river dolphin -- with habitat backgrounds and conservation status labels -- professional classroom display quality

Section D: Printable Fill-in Worksheet Illustrations [Black & White, Exercise Format]

9. Human skeleton worksheet diagram: clean black and white anatomical illustration of a full human skeleton with 15 numbered blank label lines pointing to: skull, mandible, clavicle, ribcage, sternum, humerus, radius, ulna, spine, pelvis, femur, patella, tibia, fibula, and foot bones -- exercise format for students to write in bone names

10. Weather symbols worksheet chart: black and white printable exercise sheet with 8 weather condition illustrations -- sunny with rays, partly cloudy, overcast, light rain, heavy storm with lightning, snow, windy with leaves blowing, and foggy -- each with a blank line for students to write the weather name and a temperature range box
